### **3. Details of the Offer**

#### **3.1 Background of the Offer**

On 6 November 2017, the Company announced a share purchase plan offering Eligible Shareholders the opportunity to acquire up to \$15,000 worth of New Shares at \$0.075 per New Share. On 13 November 2017, the Company despatched letters of offer under the SPP to Eligible Shareholders.

The SPP closed on 20 November 2017 and 40,000,376 New Shares were issued to Eligible Shareholders who subscribed for New Shares under the SPP, to raise a total of \$3,000,025 before expenses.

Under the terms of the SPP, the Company undertook to offer Eligible Shareholders who subscribed for New Shares under the SPP (**Subscribers**), the right to subscribe for one free SPP Option for every two New Shares subscribed for and allotted to them by the Company under the SPP.

This Prospectus makes the Offer to the Subscribers.

#### **3.2 The Offer**

By this Prospectus, the Company offers for subscription for nil consideration up to 20,000,450 free SPP Options to Subscribers on the basis of one free SPP Option for every two New Shares allotted by the Company to Subscribers under the SPP.

The SPP was significantly oversubscribed meaning that the Company had to scale back applications for New Shares received from Subscribers. As a result, all Subscribers were allotted less New Shares than the number they applied for under the SPP. The number of SPP Options offered to each Subscriber under this Prospectus will be based on the number of New Shares allotted to each Subscriber by the Company (after scale back) and not the number of New Shares applied for by each Subscriber under the SPP.

The Offer is only extended to the Subscribers, accordingly, personalised Application Forms will only be provided by the Company to these parties.

No funds will be raised from the grant of SPP Options pursuant to this Prospectus as they are being issued for nil consideration.

All of the SPP Options offered under this Prospectus will be granted on the terms and conditions set out in Section 5.1 of this Prospectus.

All of the Shares issued upon the future exercise of the SPP Options offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5.2 for further information regarding the rights and liabilities attaching to the Shares.

#### **3.3 Minimum subscription**

There is no minimum subscription.

#### **3.4 Election of Subscribers**

Subscribers may elect to either:

- (a) do nothing, in which case you will not receive any SPP Options; or
- (b) apply for SPP Options on your personalised Application Form (refer to Section 3.5).

### **3.5 Acceptance**

To accept the Offer simply complete your personalised Application Form and **post it to the address shown below**.

You may accept all or part of your SPP Option entitlement described in your personalised Application Form.

The SPP Options are being issued for nil consideration and therefore you are not required to pay any funds with your Application.

You can only apply for SPP Options if you are a Subscriber and have received a personalised Application Form from the Company.

The total number of SPP Options for which you apply must not exceed your entitlement as shown on your personalised Application Form. If the number of SPP Options subscribed for in the Application Form is more than the number of SPP Options to which you are entitled under the Offer (including because of a scale back of the number of New Shares that you subscribed for under the SPP), then the Company reserves the right to either:

- return the Application Form and not issue any SPP Options to you; or
- accept your application for the maximum number of SPP Options you are entitled to receive.

You must make an application for SPP Options by completing the personalised Application Form accompanying this Prospectus and signing the form where indicated and returning it to the Company's Share Registry in the envelope provided by no later than 5.00pm (ACDT) on the Closing Date.

Completed personalised Application Forms must be posted to the following address:

Computershare Investor Services Pty Limited  
GPO Box 1326  
Adelaide, South Australia, 5001

By submitting a completed Application Form in accordance with the instructions set out on that form, you are applying for SPP Options on the terms and conditions of this Offer. Once an Application has been made, it cannot be revoked. No notice of receipt of the Application will be provided by the Company or the Registry.

If the Application Form is not completed correctly, it may still be treated as valid by the Company in its absolute discretion. The Directors' decision as to whether to treat the acceptance as valid and how to construe, amend or complete the Application Form is final.

### **3.6 No rights trading**

The rights to subscribe for SPP Options under this Prospectus are non-renounceable, which means that you cannot sell or transfer part of your SPP Option entitlement.

### **3.7 SPP Options are unlisted**

The SPP Options will be unlisted meaning that the Company will not make application for Official Quotation of the SPP Options however, the Company will make application for quotation of all Shares issued pursuant to the exercise of SPP Options (refer to Section 5.1(j)).

### **3.8 Shortfall**

Any SPP Option entitlement not taken up under the Offer (**Shortfall**) will result in those SPP Options not being issued. This means that Subscribers will not be entitled to apply for the Shortfall nor will the Shortfall be offered to third parties under a separate offer. For example, if a group of Subscribers do not apply for 1,000,000 SPP Options (in aggregate) under the Offer, then only 19,000,450 SPP Options will be issued.

### **3.9 Issue of Certificates**

You will be forwarded an option certificate to reflect your holding of unlisted SPP Options issued to you under this Prospectus. The option certificate is evidence of ownership of unlisted SPP Options in the Company and therefore should be held in a secure location. You will not be forwarded a statement of your holding.

If the balance of your unlisted SPP Options changes, then this will be reflected by the SPP Option certificate/s you hold by either an additional or replacement SPP Option certificate being issued.

You may request a replacement SPP Option certificate by completing a Lost Certificate Declaration if you cannot locate your certificate for which a cost may be charged.

### **3.10 ASX Listing Rule 7.1**

The SPP Options are being offered and issued in accordance with ASX Listing Rule 7.1 which allows the Company to issue up to 15% of its equity securities without the need to seek shareholder approval, provided that the making of the Offer would not cause Archer to breach the 15% ceiling at the time of the making of the offer.

The Company confirms that it has sufficient capacity under ASX Listing Rule 7.1 to issue the SPP Options and the Offer of the SPP Options will not cause the Company to breach ASX Listing Rule 7.1.

The Company intends to hold a general meeting after the close of the Offer for the purpose of seeking Shareholder approval to ratify the issue of the SPP Options which will allow the Company to “refresh” its 15% placement capacity under ASX Listing Rule 7.1.

### **3.11 Enquiries**

Any questions concerning the Offer should be directed to the Company on +61 8272 3288 or to Damien Connor, Company Secretary, at [dconnor@archerexploration.com.au](mailto:dconnor@archerexploration.com.au).

## **6. Risk factors**

### **6.1 Introduction**

The SPP Options offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for SPP Options pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of Shares and the SPP Options.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### **6.2 Key Risks**

- (a) Going concern risk

The Directors have determined that future equity raisings or debt financing arrangements will be required to assist the funding of the Company's activities to meet the Company's objectives. There is no certainty that these will be successfully completed to provide adequate working capital for the Company.

In the event that the Company is unable to arrange appropriate financing over the next 6 - 12 months, there is some uncertainty as to whether the Company can continue as a going concern, which is likely to have a material adverse effect on the Company's activities and the Company may not be able to continue in its present form.

(b) Future capital needs

Further funding may be required by the Company to support its ongoing activities and operations. There can be no assurance that such funding will be available on satisfactory terms or at all.

The Company's ability to raise further capital within an acceptable time, of a sufficient amount and on terms acceptable to the Company will vary according to a number of factors, including prospectivity of projects (existing and future), the results of exploration, subsequent feasibility studies, development and mining, share market and industry conditions and the price of relevant commodities and exchange rates.

No assurance can be given that future funding will be available to the Company on favourable terms (or at all). If adequate funds are not available on acceptable terms the Company may not be able to develop its projects and it may impact on the Company's ability to continue as a going concern.

Any additional equity financing will dilute Shareholders and debt financing, if available, may restrict the Company's financing and operating activities.

(c) Speculative investment

The Company is at an early stage of its development and accordingly there are significant risks associated with investing in the Company. Potential investors should take into account the risks of taking up the Offer or of exercising their subsequent rights under the SPP Options Offer to acquire Shares and consider carefully whether investing in Shares is an appropriate investment in light of their personal circumstances.

(d) Exploration and Development

Exploration by its nature contains elements of significant risk. Ultimate success depends on the discovery of economically recoverable resources, obtaining the necessary titles and governmental regulatory approvals and obtaining and servicing of funding for mining operations if and when a decision to mine is made (if at all).

There can be no assurance that the Company's existing projects or any other projects or tenements that the Company may acquire in the future will result in the discovery of significant resources. Even if significant resources are identified, there can be no guarantee that they will be able to be economically exploited.

The Company's current and future operations, including exploration, appraisal and possible production activities may be affected by a range of factors, including (without limitation):

- (i) geological conditions;
- (ii) limitations on activities due to seasonal weather patterns;
- (iii) the availability of drilling rigs and other machinery necessary for the Company to undertake its activities;
- (iv) unanticipated operational and technical difficulties encountered in survey, drilling and production activities;
- (v) mechanical failure of operating plant and equipment, adverse weather conditions, industrial and environmental accidents, industrial disputes and other force majeure events;
- (vi) unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment; and

- (vii) prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals (including clearance of work programs pursuant to existing, and any future access agreements entered into with indigenous parties).
- (e) Access to third party infrastructure

The Company has identified access to third party infrastructure as a means of reducing capital costs for the development of the Leigh Creek Magnesite Project. Whilst discussions with such third parties have been progressing there is no guarantee that the Company will be able to reach a legally binding agreement for access to the infrastructure. Any failure by the Company to access such infrastructure will most likely make the Leigh Creek Magnesite Project unviable.

### 6.3 Company specific risks

- (a) Grant of Mining Tenements

In late 2016, the Company lodged with the South Australian Government an application for a mining lease and two associated miscellaneous purposes licences (together the **Mining Tenements**) in relation to the mining and process of graphite at the Company's Eyre Peninsula Graphite Project.

On 9 November 2017 the Company announced that it had received the draft Mining Tenement terms and conditions and then on 20 November 2017 the Company announced that it had accepted those draft terms and conditions.

The decision whether or not to grant the Mining Tenements sits with the South Australian Minister for Mines and Energy. The fact that the draft terms and conditions were given to the Company gives the Company confidence that the Mining Tenements will ultimately be granted however, there is a risk that the Mining Tenements will not be granted and that the Company will be unable to mine and process graphite on the Eyre Peninsula.

- (b) Purchase of Campoona land

On 12 May 2015, the Company announced that it had signed a contract to purchase the land on which the Campoona graphite mine will be located. The Company and the vendors have since been negotiating a variation to that contract however, no agreement has yet been reached and there is a risk that the Company and vendors will not reach agreement.

If no agreement is reached between the Company or vendors, then the Company or vendors may ultimately decide to commence legal proceedings to resolve the matter. The Company wishes to avoid any legal proceedings and confirms that at the date of this Prospectus, that: the Company has not commenced such legal proceedings, has not formed any intention to commence any such legal proceedings and is not aware of the vendors having commenced any such legal proceedings.

- (c) Unforeseen expenditure risk

Expenditure may need to be incurred that has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the expenditure proposals of the Company.

- (d) Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and

its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(e) Exploration risk

Mineral exploration and development is a high-risk undertaking. There can be no assurance that exploration of acquired projects or any other exploration properties that may be acquired in the future will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its projects and obtaining all required approvals for its activities. In the event that exploration programs are unsuccessful this could lead to a diminution in the value of its projects, a reduction in the case reserves of the Company and possible relinquishment of part or all of its projects.

(f) Resource Estimates

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when made may change significantly when new information becomes available. In addition, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should the Company encounter mineralisation or formations different from those predicted by past sampling and drilling, resource estimates may have to be adjusted and mining plans altered in a way which could impact adversely on the Company's operations.

(g) Environmental risks

The operations and proposed activities of the Company's projects are subject to strict governmental laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Government authorities may, from time to time, review the environmental bonds that are placed on permits. The Directors are not in a position to state whether a review is imminent or whether the outcome of such a review would be detrimental to the funding needs of the Company.

(h) Title risk and native title

Interests in tenements in Australia are governed by the respective state legislation and are evidenced by the granting of licenses' or leases. Each license or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if license conditions are not met or if insufficient funds are available to meet expenditure commitments or if the government elects not to renew the Company's tenements.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest; there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining

consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

(i) Graphite and magnesite price volatility

Substantially all of the Company's forecast revenues and cash flow (should the Company enter production) will be derived from the sale of graphite and magnesia products. Therefore, the financial performance of the Company would be exposed to fluctuations in the graphite and magnesia (caustic calcined and deadburned magnesia) price. Historically, the graphite price has fluctuated widely and has experienced periods of significant decline.

Graphite and magnesia prices are affected by numerous factors and events that are beyond the control of the Company. These factors and events include general economic activity, world demand, forward selling activity as well as general global economic conditions and political trends.

If graphite and/or magnesia prices should fall below or remain below the Company's costs of production for any sustained period due to these or other factors and events, then the Company's exploration and proposed production could be delayed or even abandoned. A delay in exploration or production or the abandonment of one or more of the Company's projects may require the Company to write down its graphite and/or magnesite assets and may have a material adverse effect on the Company's production, earnings and financial position.

#### **6.4 Risks specific to the Offer**

(a) Changes in Share price

There is no guarantee that the market price of the underlying Shares will trade above the exercise price of the SPP Options. Accordingly, there is a risk that the SPP Options could expire out of the money.

(b) Subscribers should read additional information

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. You should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

#### **6.5 Industry and general risks**

(a) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(b) Insurance risks

The Company intends to insure its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect of the business, financial condition and results of the Company.

Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(c) Competition risk

The industry in which the Company will be involved is subject to domestic and global competition. While the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, whose activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

(d) Government and policy changes

Government action or policy change, particularly in relation to lands and infrastructure, compliance with environmental regulations, taxation and royalties, may adversely affect the Company's operations and financial performance.

(e) Litigation risks

Litigation risks to the Company include, but are not limited to, employee claims, contractual claims, environmental claims, occupational health and safety claims, regulatory disputes, legal actions from special interest groups, as well as third party damage or losses resulting from operations.

## 6.6 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the SPP Options offered under this Prospectus. Therefore, the SPP Options to be issued pursuant to this Prospectus carry no guarantee that the Share price will exceed the exercise price of the SPP Options.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for SPP Options pursuant to this Prospectus.

Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

## **7.6 Director Remuneration**

The remuneration of an executive Director is decided by the Board, without the affected executive Director participating in that decision-making process. The total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director. The current amount has been set at an amount not to exceed \$500,000 per annum.

A Director may be paid fees or other amounts (i.e. non-cash performance incentives such as Options or Performance Rights, subject to any necessary Shareholder approval) as the other Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director. In addition, Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in or about the performance of their duties as Directors.

The following table shows the total (and proposed) annual remuneration paid to both executive and non-executive directors (including bonuses, allowances and share based payments).

## 7.10 Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain.

Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Once your Personal Information is no longer required, it will be destroyed or de-identified. As at the date of this Prospectus, the Company does not anticipate that Personal Information will be disclosed to any overseas recipient.

Subject to certain exemptions under law, you may have access to Personal Information that the Collecting Parties hold about you and seek correction of such information.
