Level 1, 135 Fullarton Road
Rose Park SA 5067
Telephone: (08) 8332 5033
Facsimile: (08) 8364 4288

For further information please contact:

Greg English
Executive Chairman
Archer Exploration Limited

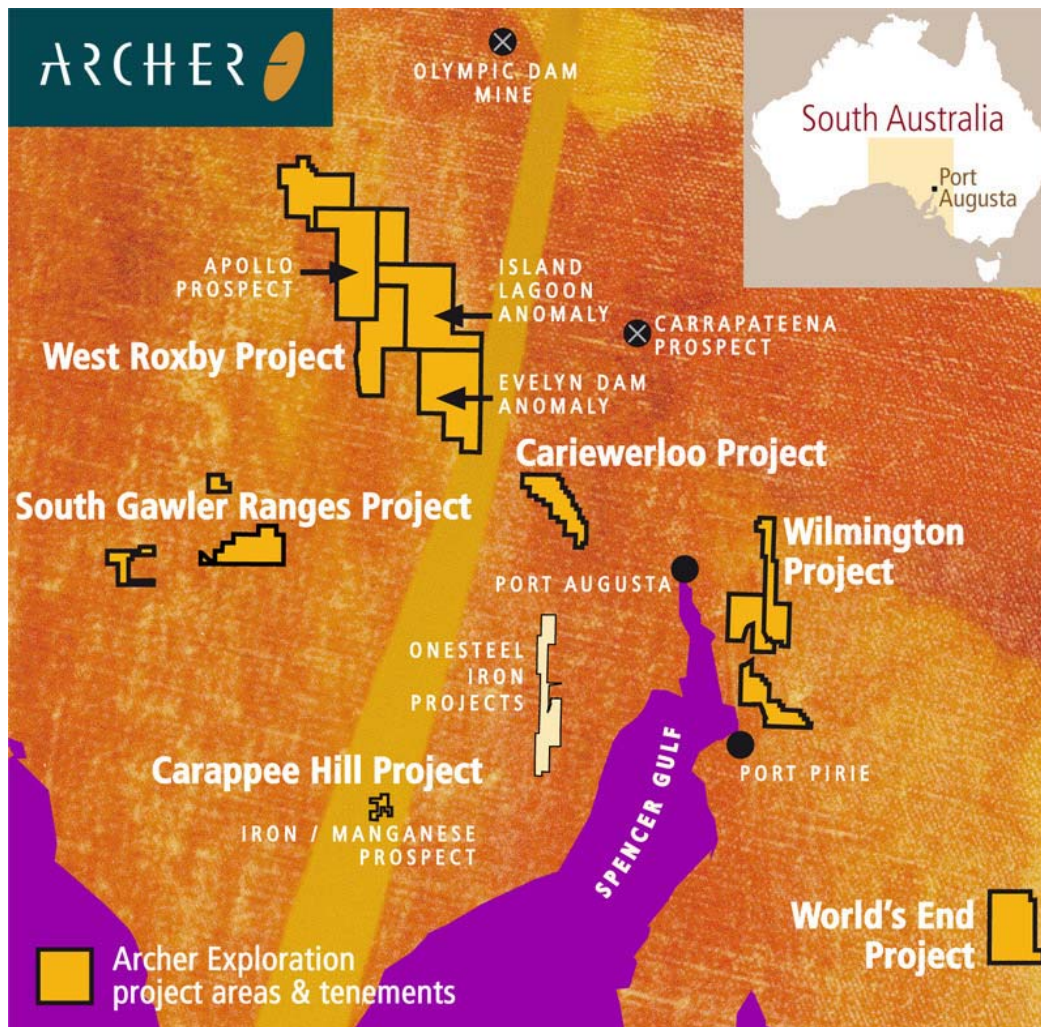

ABOUT ARCHER EXPLORATION

Archer Exploration Limited is an iron ore, manganese, copper and phosphate explorer focused on the discovery of world-class deposits. The Company has carefully acquired a portfolio of wholly-owned projects in the highly prospective Gawler Craton region of South Australia.

The Company's Carappee Hill Project on South Australia's Eyre Peninsula contains iron ore grades of up to 57% and manganese grades of up to 53.8%. The Company is undertaking further exploration at Carappee Hill and is assessing a range of options for the further development of this exciting project.

The Company is also well advanced on the exploration of its Olympic Dam style iron oxide-copper-gold-uranium (IOCG-U) deposit. The Evelyn Dam anomaly has early geophysical characteristics similar to those of Olympic Dam and the recent Carrapateena discovery.

The World's End Project area covers the historic Fairview Phosphate Mine which was last mined in 1903 when it yielded 100 t of hand-picked phosphate ore grading 25% P₂O₅.

Archer's project areas and tenements, covering prospective iron, manganese, copper and phosphate tenements in the Gawler Craton region of South Australia.
